

Dear Brett,

I hope you are doing well and that the post-launch period for Impact has been treating you smoothly. I am genuinely looking forward to trying the diverse interactive elements. Specifically, the Planetary Defense section piques my curiosity, and I'd love to learn more about how it came together.

Our recent half-hour conversation that turned into more than an hour has stayed with me. It gave me a much clearer sense of how Media Exhibition at the natural history museum approaches its work, and it strengthened my interest in contributing. The balance you described between scientific accuracy and creative interpretation (such as the coexistence of grass and pterosaurs in FLAP) is exactly the kind of environment I want to be part of.

Now that I have a better understanding of my year ahead, I wanted to move forward with my internship application for your department. My CV is attached, but I would like to invite you to visit the website I built for this. Depending on the device used, the interactive section may need a brief moment to load:

<https://lydiablott.github.io/amnh-application-lynnlimbach>

Furthermore, I will very spontaneously be in New York from December 13 to January 11 and, as you kindly offered, I would be very happy to stop by and visit the department if there is a moment that works for you.

I would be glad to hear from you and would love to connect while I am in New York.

Best regards,  
Lynn Limbach
